We used to eat food from mother nature

*Full of vitamins, minerals, phyto- and micro nutrients, beta glucans, fibers, healthy fats and a good balance of Omega-6 and Omega-3. (Ideal ratio: **3:1**)*

Today we eat man-made food

*Low in key nutrients, high in sugar, full of empty calories, low in fibers, and with an imbalance between essential fatty acids Omega-6 and Omega-3 which we can't make so we have to get them in our diets. (Average ratio: **15:1**)*

Are you where you want to be or are you in the danger zone?

3:1 ideal ratio

15:1 average ratio

- Imbalance of Omega-6 and Omega-3
- Low levels of Omega-3
- Inadequate polyphenols in your diet
- Low levels of vitamin D₃

How do we **leverage** this?

In Zinzino, 50 percent is paid back to our Partners in commissions and perks.
