

COLLAGEN BOOZT

DIETARY SUPPLEMENT – NATURAL FLAVOR OF CHERRY – 10-DAY ROUTINE

PRODUCT HIGHLIGHTS

Collagen Boozt is a cherry-flavored liquid formula with high levels of two key ingredients: marine collagen [8 g/sachet] and hyaluronic acid [120 mg/sachet]. Sourced from fish, marine collagen is known for its high bioavailability* and potential to improve skin structure and elasticity*, while hyaluronic acid is valued for its moisture-retaining properties of the skin*.

Additionally, Collagen Boozt is a blend of prebiotics, postbiotics, and active ingredients such as: Vitamin C contributes to normal collagen formation for the normal function of the skin*; biotin and zinc help maintain normal skin*; and copper supports normal skin pigmentation*. Together, these ingredients work synergistically to support and invigorate your skin's natural functions and appearance.*

Collagen Boozt is designed as a 10-day routine, carefully formulated to support your collagen needs*.

Content: 10 × 1.55 FL OZ (46 mL)

KEY BENEFITS

Supports skin elasticity

- ▶ Marine collagen contributes to the maintenance of skin elasticity*.

Contributes to the skin's surface structure

- ▶ Marine collagen supports the normal structure of the skin*.

Supports skin hydration

- ▶ Marine collagen peptides support hydration*, and hyaluronic acid helps retain moisture in the skin*.

Maintains skin function

- ▶ Vitamin C contributes to normal collagen formation for the normal function of skin*.

Supports skin maintenance

- ▶ Biotin and Zinc helps maintain normal skin*.

ZINZINO

SUPPLEMENT FACTS

Supplement Facts		
Serving Size	1 Sachet	
	Amount Per Sachet	% Daily Value
Calories	40	
Total Carbohydrate	3 g	1%*
Dietary Fiber	2 g	7%*
Protein	8 g	0%*
Vitamin C (as sodium ascorbate)	80 mg	89%
Biotin	25 mcg	83%
Magnesium (as magnesium citrate)	56 mg	13%
Zinc (as zinc sulfate)	3 mg	27%
Copper (as copper citrate)	0.15 mg	16%
Sodium	12 mg	1%
Hydrolysed Fish Collagen (cod, haddock, pollock)	8 g	†
Inulin, (from chicory root)	2500 mg	†
L-Arginine	625 mg	†
Glycine	625 mg	†
Bilberry (fruit) Extract	150 mg	†
Hyaluronic Acid	120 mg	†
<i>Lactobacillus casei</i> Plenibiotic™	100 mg	†
Acerola (cherry) Extract	66.5 mg	†
Rice Bran Ceramides	12.5 mg	†

* Percent Daily Values are based on a 2,000 calorie diet.
† Daily Value not established.

OTHER INGREDIENTS: Water, glucono delta-lactone, citric acid, natural flavor, black cherry flavor, black carrot juice concentrate (color), potassium sorbate (preservative), steviol glycosides from stevia.

SUGGESTED USE: *Adults:* 1 sachet per day for 10 days. Do not exceed recommended daily dose. Dietary supplements are not intended as a substitute for a balanced and varied diet.

WARNING: Please consult your doctor before taking this product if you are pregnant or breastfeeding.

STORAGE: Store at room temperature in a dark, dry place, or refrigerate for the best taste experience. Keep out of reach of children.

MARINE COLLAGEN PEPTIDES

Collagen Boozt uses hydrolyzed marine collagen peptides from MSC-certified fish, specifically types I and III, which are broken down into smaller, absorbable molecules for enhanced bioavailability*. Together, type I and III, work synergistically to help reduce the appearance of wrinkles and signs of aging*. The high quality marine collagen amino acids such as glycine, proline, and hydroxyproline, are integral to the body's collagen production and contribute to improved skin appearance*. The product contains a total of 8 grams of protein from marine collagen peptides.

HYALURONIC ACID

Collagen Boozt contains a high concentration [120 mg] of hyaluronic acid, a naturally occurring polysaccharide found in the skin, connective tissues, and eyes. Known for its exceptional ability to attract and retain moisture, hyaluronic acid helps to maintain the skin's moisture levels, contributing to a plump and supple appearance*. Hyaluronic acid can also improve the appearance of wrinkles by keeping the skin hydrated and reducing the visibility of fine lines*.

OTHER DIETARY INGREDIENTS

CHICORY ROOT FIBER

Chicory root fiber, derived from the roots of *Cichorium intybus*, is a natural prebiotic composed primarily of inulin, a soluble dietary fiber. This fiber passes through the upper digestive tract and is fermented by the microbiota in the colon, which contributes to a balanced gut microbiome*. In addition, it has a slightly sweet taste and improve the texture and consistency of Collagen Boozt.

LACTOBACILLUS CASEI SUBSP. CASEI 327 (PLENIBIOTIC™)

Plenibiotic™ is a postbiotic ingredient derived from the fermentation of *Lactobacillus casei subsp. casei* 327. Unlike probiotics, which are live bacteria, postbiotics like Plenibiotic™ consist of non-living bacterial components and metabolites, such as short-chain fatty acids, peptides, and exopolysaccharides, that remain after bacterial fermentation. These compounds are included in Collagen Boozt for their role in supporting a balanced gut microbiome*, contributing to the product's holistic approach to skin care.

L-ARGININE AND GLYCINE

Collagen Boozt includes L-Arginine and glycine, amino acids that are important for various bodily functions. L-Arginine is a semi-essential amino acid that supports overall metabolic processes, while glycine is a non-essential amino acid that is a fundamental building block of proteins, including collagen*. Both amino acids contribute to the overall amino acid profile of the product, supporting the skin's appearance and helping to maintain its structure*.

ACEROLA CHERRY EXTRACT

Acerola cherry extract, derived from the small, bright red fruit of the acerola tree, has naturally occurring vitamin C and antioxidants. Vitamin C supports normal collagen formation and helps protect cells from oxidative stress*. In addition to its nutritional benefits, the extract also contributes to the product's flavor profile, enhancing the overall sensory experience.

VITAMIN C (SODIUM ASCORBATE)

Vitamin C, included in the form of sodium ascorbate, contributes to normal collagen formation, which is important for the normal function of the skin*. Additionally, vitamin C helps protect cells from oxidative stress, supporting the skin's natural defense mechanisms*.

BILBERRY EXTRACT

Bilberry fruit extract is derived from the small, dark blue berries of the bilberry plant, which is native to Northern Europe. The berries are closely related to blueberries and are known for their deep color and rich history of use in traditional practices. Bilberry extract is used in Collagen Boozt for its concentrated form delivering naturally occurring compounds. These compounds give bilberries their distinctive color and flavor, enhancing the organoleptic properties of Collagen Boozt.

RICE BRAN CERAMIDES

Rice bran ceramides, natural lipids derived from the outer layer of rice grains, are included in Collagen Boozt for their role in supporting the skin*. These ceramides help maintain the skin's moisture levels and contribute to a smooth and supple appearance*, making them a key component of the product's formulation.

Zinc contributes to the protection of cells from oxidative stress.*

Copper contributes to the protection of cells from oxidative stress.*

Fiber: Contains 2g fiber/per serving

Protein: Contains 8g protein/per serving

Vitamin C

Vitamin C contributes to normal collagen formation for the normal function of blood vessels*

Vitamin C contributes to normal collagen formation for the normal function of bones*

Vitamin C contributes to normal collagen formation for the normal function of cartilage*

Vitamin C contributes to normal collagen formation for the normal function of gums*

Vitamin C contributes to normal collagen formation for the normal function of skin*

Vitamin C contributes to normal collagen formation for the normal function of skin*

Vitamin C contributes to normal energy-yielding metabolism*

Vitamin C contributes to normal functioning of the nervous system*

Vitamin C contributes to the normal function of the immune system*

Vitamin C contributes to the protection of cells from oxidative stress*

Vitamin C contributes to the regeneration of the reduced form of vitamin E*

Biotin

Biotin contributes to normal energy-yielding metabolism*

Biotin contributes to normal functioning of the nervous system*

Biotin contributes to normal macronutrient metabolism*

Biotin contributes to the maintenance of normal hair*

Biotin contributes to the maintenance of normal mucous membranes*

Biotin contributes to the maintenance of normal skin*

Source of Magnesium

Magnesium contributes to electrolyte balance*

Magnesium contributes to normal energy-yielding metabolism*

Magnesium contributes to normal functioning of the nervous system*

Magnesium contributes to normal muscle function*

Magnesium contributes to normal protein synthesis*

Magnesium contributes to the maintenance of normal bones*

Magnesium contributes to the maintenance of normal teeth*

Magnesium has a role in the process of cell division*

High in Zinc

Zinc contributes to normal DNA synthesis*

Zinc contributes to normal acid-base metabolism*

Zinc contributes to normal macronutrient metabolism*

Zinc contributes to normal metabolism of fatty acids*

Zinc contributes to normal protein synthesis*

Zinc contributes to the maintenance of normal bones*

Zinc contributes to the maintenance of normal hair*

Zinc contributes to the maintenance of normal nails*

Zinc contributes to the maintenance of normal skin*

Zinc contributes to the maintenance of normal testosterone levels in the blood*

Zinc contributes to the normal function of the immune system*

Zinc contributes to the protection of cells from oxidative stress*

Zinc has a role in the process of cell division*

Source of Copper

Copper contributes to maintenance of normal connective tissues*

Copper contributes to normal energy-yielding metabolism*

Copper contributes to normal functioning of the nervous system*

Copper contributes to normal hair pigmentation*

Copper contributes to normal iron transport in the body*

Copper contributes to normal skin pigmentation*

Copper contributes to the normal function of the immune system*

Copper contributes to the protection of cells from oxidative stress*
