PLANT STEM CELL TECHNOLOGY

STEM CELL EXTRACTION FROM AWARDING-WINNING MAJESTEM™ (EDELWEISS) AND SNOW ALGAE

This biotechnological procedure maintains and activates the skin's stem cells. Activated stem cells positively affect multiple areas, including genes, cells, matrix and tissue – areas closely linked to reducing signs of aging. They protect cell DNA, stimulate and improve natural cell renewal, strengthen skin structure, and make skin smooth for firmer and younger-looking skin.

MOISTURIZES

MOISTURE COMPLEX – CRISTALHYAL® (ECOCERT/COSMOS APPROVED)

The high-molecular weight, long-chain, biotechnologically derived hyaluronic acid (obtained by fermentation) attaches itself to the skin's deep layer. Here, it forms a protective external layer over the skin. It smoothes the skin, making it soft and locking moisture into the deep layer.

SWISS GLACIER WATER (INCAPSULATED INTO LIPOSOMES)

24H refreshing hydration, helps to protect the skin cells on hot days, maintains the skin's moisture all day long, in-depth comfort for dry skin.

OTHER EFFECTS

- ✓ **PROVENCE ROSE**, a gentle antiseptic and astringent, anti-inflammatory, cleanses skin and prevents blemishes. Helps minimize redness and soothes irritation.
- ✓ **WITCH HAZEL** relieves inflammation, reduces redness, soothes irritation and itchiness, treats sunburns and tightens pores.
